

GRAY COVERAGE

Covering Gray Formula

MIX RATIO	1 + 1
DEVELOPER	20 VOL
TIME	10-15 MIN

Things To Keep In Mind When Covering Gray

- AEGIS10 is not progressive.
 - In 10 minutes, you have deposited 95% of your pigment, if needed keep on for an extra 5 minutes.
- Clean hair - May need to clarify prior.
- Deposit color - Do not move brush.
- Apply using thin sections!
- Use fresh peroxide.
- Double-check areas of the scalp that are producing heat because heat rises and moves the product up.
- When covering 100% gray:
 - If necessary, add the missing underlying pigment to achieve the desired result.
 - For example, if you are using a 7.0, you can add gold to your formula with a 7.3.

LIFTING WITH COLOR

Lightening 2-3 Levels

MIX RATIO	1 + 1
DEVELOPER	30 VOL
TIME	10 MIN

High Lifts

MIX RATIO	1 + 2
DEVELOPER	40 VOL
TIME	20 MIN

TONE ON TONE

Tone on Tone Formula

MIX RATIO	1 + 1.5
DEVELOPER	10 VOL
TIME	10 MIN

GLAZING

Glazing Formula

MIX RATIO	1 + 1
DEVELOPER	2.8 VOL
TIME	3-8 MIN
DESIRED SHADE	25-50%
HYALURONIC CLEAR	50-75%

TONING

Toning With AEGIS10 Color

MIX RATIO	1 + 2
DEVELOPER	2.8 VOL, 5 VOL, NO LIFT MODIFIER
TIME	3-8 MIN

- Because it deposits so quickly you may want to add some Hyaluronic Clear (HC) (i.e. 25-30% max)
